CONTENTS

Special Issue: International Thermal Analysis and Research Trends. A Collection of Papers Presented at the 19th North American Thermal Analysis Society Conference, Boston, MA, USA, 23–26 September 1990

Preface ix

Emanation thermal analysis and its application potential
V. Balek (Řež, Czechoslovakia) 1

Thermal analysis—a resurgence in the earth sciences: with applied, industrial and environmental aspects
S.St.J. Warne (Shortland, NSW, Australia) 19

A study of the effects of CeO_2 on the crystallization of CaO/P_2O_5 glass
J.-S. Lee (Long-Tan, Taiwan), J.-C. Perng and C.-W. Huang (Chung Li, Taiwan) and W.-P. Pan (Bowling Green, KY, USA) 29

Influence of water vapor on the thermal dehydration of $Li_2SO_4 \cdot H_2O$
J. Huang and P.K. Gallagher (Columbus, OH, USA) 35

Dielectric studies of ferroelectric liquid crystals
I. Teraoka, R.L. Siemens, R.J. Twieg and K. Betterton (San Jose, CA, USA) 47

Selection of an optimum calorimetry method for measuring specific heat of ceramics at high temperature
P. Le Parlouer (Caluire, France) 55

Observations on using thermogravimetry as a tool to monitor binder burnout in ceramics
D.R. Hammond and S.H.W. Hankin (Waltham, MA, USA) 65

A TG method for evaluation of limestone sorbents used in circulating fluidized bed combustors
D.T. Liang, L.J. Wilson and C.A. Hamer (Ottawa, Ont., Canada) 73

Comparison of crystallization kinetics studied by DSC and TGA
M. Mao and Z. Altounian (Montreal, Que., Canada) 85

On the use of the compensation law to describe cooperative relaxation kinetics in thermally stimulated processes: a new view
J.P. Ibar (Stamford, CT, USA) 91

Heat- and mass-transfer approach to decomposition kinetics
J. Czarnecki (Cerritos, CA, USA) 107

Identification of process hazards using thermal analytical techniques
L.D. Tuma (Rahway, NJ, USA) 121

New direct measurement techniques for thermal conductivity, thermal diffusivity, and specific heat of advanced materials
K. Henry and K.G. Coumou (Cambridge, MA, USA) 129

Measuring ΔH using TG–DTA and incorporating mass change into the result
R. Hoffman and W.-P. Pan (Bowling Green, KY, USA) 135

Molecular mobility associated with T_g in $DGEBA_{\bar{n}}$–DDM networks
J. Boye, J.J. Martinez, Ph. Demont and C. Lacabanne (Toulouse, France) 147

Influence of orientation in the amorphous phase of poly(ethylene terephthalate)
A. Bernes, D. Chatain and C. Lacabanne (Toulouse, France) and G. Lorentz (Saint-Fons, France) 155

Thermal characteristics of the polymeric components of a CF-18 flight data recorder
D. Cooney and E. Politis (Ottawa, Ont., Canada) 165

Evaluation of ethylene–propylene rubber O-rings for incoming quality control
R.M. Rush (Chicago, IL, USA) 171

Characterization of phenolic resin with thermogravimetry–mass spectrometry
C. Chang and J.R. Tackett (Miamisburg, OH, USA) 181

Quantitative thermogravimetric analysis of starch contents in several polymer systems
E.A. Phillips and S.D. Blazey (Akron, OH, USA) 191

Effect of electron radiation on polymer matrix systems
G.S. Hickey (Pasadena, CA, USA) 199
Applications of the oxidative induction test to medical polymers
L. Woo, M.T.K. Ling and E. Chan (Round Lake, IL, USA) 209
A TGA study correlating polymer characteristics with smoke and flammability properties of polyester and phenolic resins
R.M. Morchat and J.A. Hiltz (Dartmouth, NS, Canada) 221
A dynamic mechanical thermal analysis (DMTA) study of polyethylenes
H. Sha, X. Zhang and I.R. Harrison (University Park, PA, USA) 233
Comparing thermal stimulated current (TSC) with other thermal analytical methods to characterize the amorphous phase of polymers
J.R. Saffell (Ottery St. Mary, Devon, UK), A. Matthiesen and R. McIntyre (Stamford, CT, USA) and J.P. Ibar (New Canaan, CT, USA) 243
Multiple compensation phenomena in the amorphous phase of polymers
J.P. Ibar (Stamford, CT, USA) 265
Study of the thermal relaxation effects in polymers by a conjugated use of thermally stimulated depolarization and polarization current methods
J. Vanderschueren, J. Niezette, G. Yianakopoulos and A. Thielen (Liège, Belgium) 287
A dual split kinetics interpretation of compensation law at the T_g of amorphous polymers
J.P. Ibar (Stamford, CT, USA) 297
Thermostimulated current study of the dynamic behaviour of a biocomposite: calcified tissue
A. Lamure, M. Martin and C. Lacabanne (Toulouse, France), M.F. Harmand (Martillac, France) 313
Oxidation kinetics of type 2A natural diamond [100] and [111] surfaces by TG
S. Dallek, L. Kabacoff and M. Norr (Silver Spring, MD, USA) 323
